

# How NPI is Doing Our Part to Minimize The Spread of COVID-19

**1** NPI inspectors bring their own antibacterial soap, hand sanitizer, towels, protective gloves and shoe covers.

**2** Hands are washed according to CDC recommendations and sanitized before your inspector enters your home.

**3** After inspecting bathroom and kitchen fixtures, all touched areas are treated with a surface-appropriate sanitizing wipe.

**4** All of our inspectors are required to stay home if they show any signs or symptoms of illness.

**5** NPI inspectors understand that flexibility is key during this time and will always respect your personal preferences. If you need to postpone your inspection for any reason, we make it easy to reschedule to a date that works for you.

When you choose NPI, your health and safety are our top priorities today and every day.
